

ClearShield® Anti-Graffiti

Advanced Technology. Proven Protection.

ClearShield Anti-Graffiti is a two-part, water-based liquid laminate with excellent chemical resistance, abrasion resistance and unmatched anti-graffiti properties. This versatile coating has exceptional durability and is specifically formulated for severe exterior applications where hardness, flexibility and superior protection are required.

Properties

- Formulated for Use in Areas with Risk of Graffiti
- Effective for Removal of Aerosol Paints, Latex Paints & Polishes
- Able to Be Cleaned with a Range of Solvents
- Excellent Chemical & Abrasion Resistance
- Highly Flexible & Durable
- State-of-the-Art UV Inhibitors
- Compatible with Solvent, UV, Latex & Eco-Solvent Inks
- Gloss Finish

Applications

ClearShield Anti-Graffiti can be applied by brush, roller or spray and is compatible over solvent, UV, latex and eco-solvent inks.

- Signage
- Billboards
- Banners
- Wall Coverings

Application Methods

- Short Nap Roller
- High Density Foam Roller
- Spray

Usage

ClearShield Anti-Graffiti is a two-part, water-based system designed for use as a protective coating on a variety of digitally printed signage and wall covering applications.

ClearShield Liquid Coatings

ClearShield Liquid Coatings offer industry leading UV protection, chemical resistance and mar resistance. Our state-of-the-art UV inhibitors and HALS (hindered amine light stabilizers) provide superior protection for less. Long term UV stability is dependent on many factors including coating thickness, type of ink used and the type of substrate coated.
